

TANK

CORAL SEAS COLLECTION

Created by, and for, scuba divers, outdoor adventurers and water sports enthusiasts, and inspired by some of our planet's most beautiful and dynamic ecosystems, Drink Tank, Ltd. introduces our newest portfolio of crystal clear spirits - Coral Seas.

Tank Coral Seas Vodka, Gin and Tequila are small batch and artisan crafted expressions that capture our passion for the diverse and nutrient rich oceans around the world. Carefully infused with a proprietary flavor-free blend of sustainably harvested Kombu, Coral Seas expressions are hand balanced by our master distiller to create an exceptionally refreshing spirit with inviting aromas for both versatility and mixability.

We selected Kombu because of the essential role it plays in our oceans, as well as its powerful and health-promoting characteristics. Boosting high-levels of iron, iodine and soluble fiber, Kombu is also rich in vitamins B, C, D, E, calcium, and germanium. These nutrients support digestion, organ function, muscle agility, and immunity, and bring a distinctive twist to our Tank Coral Seas portfolio.

Beyond ordinary, Tank Coral Seas is the world's most unique portfolio of Ocean Botanical Spirits!
